Invitation to Lecture

Paliambela Kolindros
A Neolithic Site in Northern Greece

Kostas Kotsakis, Ph.D.
Professor of Archaeology and Chair
Department of History and Archaeology
Aristotle University of Thessaloniki

The Neolithic site of Paliambela Kolindros was discovered in the 1980s. The Aristotle University started excavations there in 2000, with the aim of understanding the history of the settlement and site formation. Subsequent research on the site revealed that it had a long biography, starting from the Early down to the Final Neolithic, with significant changes in space organization. The settlement was initially established as clusters of pits, which during the Middle Neolithic gave way to groups of regularly spaced rectangular houses, adjacent to open courtyards, possibly defined by a network of deep ditches. During the Late Neolithic the arrangement of the settlement changed again, with the construction of two concentric stone perimeter walls, encircling the central part of the settlement, while the ditches were abandoned and filled up with deposit.

The Paliambela Kolindros excavations offer a wealth of new information on the Neolithic of Northern Greece. In this talk the different aspects of the Paliambela Kolindros project will be presented in the context of the Neolithic of the wider region.

Monday, May 5 at 19:00
at the premises of the Italian Archaeological School at Athens
(aula "Doro Levi"), Parthenonos 14, Koukaki

Refreshments will be served following the lecture at the Norwegian Institute
Tsami Karatasou 5, 5th Floor
