## REGIONAL STORIES TOWARDS A NEW PERCEPTION OF THE EARLY GREEK WORLD

An International Symposium in the honour of Professor Jan Bouzek

UNIVERSITY OF THESSALY, SARATSIS AMPHITHEATRE  
VOLOS, 18-21 JUNE 2015

The aim of the symposium is on one hand to present original overviews, mostly geographical, of the current data from the entire Greek World, dating from the 10<sup>th</sup> to the end of the 7<sup>th</sup> c. B.C., based partly on the results of the research of the members of the "ARISTEIA" project [<http://aristeia.ha.uth.gr/>] or thanks to the expertise of the invited scholars. A second aim of the symposium, is to present new evidence from important current excavation projects, thus highlighting the data published up to now. The topics of the papers are drawn from the three axis of the "ARISTEIA" research project (Settlements, Sanctuaries, Cemeteries). The regional diversities or homogeneities, the interaction between the Greek and indigenous communities, the study of the Early Greek World independently from the chronological "divide" of ca. 700 B.C., the rise of the polis, are some of the suggested lines of inquiry.

The symposium is an occasion to honour an eminent scholar of the Early Iron Age, Professor Jan Bouzek.

The symposium is part of the "ARISTEIA" Programme "Education and Lifelong Learning" and funded by the European Union (European Social Fund - ESF) and national funds
