**The Final Neolithic-Early Bronze Age transition
in Phaistos, Crete:
an investigation of continuity and change
in ceramic manufacture**

July 2016

ABSTRACT

The Final Neolithic and Early Bronze Age periods in Crete are considered as times of transformation in settlement pattern, of the emergence of complex architecture and related innovative material culture, which presage the social changes of later phases. The change in ceramic repertoire has been used to argue for a technological and cultural ‘revolution’ at the beginning of the Bronze Age, perhaps even of the influx of new population. The site of Phaistos in Southern Crete offers great potential for examining the Final Neolithic-Early Bronze Age transition in Crete and to investigate the degree of continuity and change, on account of the completeness of its stratigraphy, as well as the abundance of the ceramic material.

This study critically examines the production technology of ceramics during the Final Neolithic and Early Minoan I at Phaistos, addressing issues of technological change in this period of transition and discussing how the reconstruction of ceramic manufacture can be related to the changes occurring over time at the site. The investigation of technological variation within the ceramic assemblages is performed by integrating macroscopic observation and an integrated analytical programme involving thin section petrography, scanning electron microscopy, Fourier transform infrared spectroscopy and X-ray diffractometry, in order to reconstruct technological choices on raw material choice and manipulation, surface treatment and firing practice. This is combined with the information available on forming techniques and shape. The *chaîne opératoire* interpretative framework is adopted as a means to reconstruct the operational sequence of pottery manufacture, and to embed such an understanding within the social context of the communities of the Mesara Plain.

By examining the significance of technological choices in pottery making within the context of Phaistos, the study demonstrates a complex picture of continuity and change over the period of study, which belies recent conjecture of a single-phase transformation at the beginning of the Early Bronze Age. Furthermore, it suggests that in some of the phases considered changes in the organisation and practice of pottery production can be related to changes in consumption at this special site, which saw an array of activities before construction of the later court-centred building.

TABLE OF CONTENTS

ABSTRACT.....	I
ACKNOWLEDGEMENTS.....	III
LIST OF ABBREVIATIONS.....	IX
LIST OF FIGURES	XI
LIST OF TABLES	XXX
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 THE FINAL NEOLITHIC – EARLY BRONZE AGE TRANSITION IN CRETE	7
2.1. THE END OF THE NEOLITHIC AND THE BEGINNING OF THE BRONZE AGE: A PROBLEM OF PHASE CHRONOLOGY OR OF PHASE LABELLING?	7
2.2. INTERPRETATION OF THE FN-EM TRANSITION OVER TIME.....	15
2.2.1 <i>Population dynamics, migration and social change at the beginning of the Bronze Age in Crete: recent discoveries and interpretations.....</i>	17
2.2.2 <i>A revolution in ceramic technology?</i>	27
2.3. THE NEOLITHIC-EARLY BRONZE AGE TRANSITION IN THE AEGEAN.....	31
2.4. THE FN-EM I TRANSITION FROM THE PERSPECTIVE OF PHAISTOS: FINAL REMARKS..... 	41
CHAPTER 3 POTTERY TECHNOLOGY OF BRONZE AGE CRETE	45
3.1. A PLACE FOR MINOAN POTTERY IN THE ‘HISTORY OF CERAMIC TECHNOLOGY’.....	45
3.2. LOOKING BEYOND THE PALACE: UNEARTHING PREPALATIAL POTTERY TECHNOLOGY.....	49
3.3. POTTERY TECHNOLOGY AS A MEANS OF INVESTIGATING POLITICO-ECONOMIC SYSTEMS.....	51
3.4. BRIDGING THE GAP BETWEEN SOCIETY AND CERAMICS: THE ROLE OF TECHNOLOGICAL STUDIES IN UNDERSTANDING SOCIAL PROCESSES.....	59
3.5. CRETE AND BEYOND: A GLANCE TO RECENT TECHNOLOGICAL STUDIES ON CERAMICS IN THE AEGEAN AREA.....	61
CHAPTER 4 RECONSTRUCTING AND UNDERSTANDING MATERIAL CULTURE CHANGES: METHODS OF INVESTIGATION.....	67
4.1. OBJECT, TECHNOLOGY AND PEOPLE: DIVERGENT PATHS IN INTERPRETING MATERIAL CULTURE VARIABILITY OVER TIME	67

4.2. CHAÎNE OPÉRATOIRE IN PRACTICE: DESCRIPTION, PRACTICES AND PROCEDURES INVOLVED IN THE RECONSTRUCTION OF POTTERY TECHNOLOGY.....	80
4.2.1 <i>Paste: Raw material choices and manipulation.</i>	80
4.2.2 <i>Forming techniques.</i>	84
4.2.3 <i>Surface treatments.</i>	86
4.2.4 <i>Firing strategies.....</i>	90
4.2.5 <i>From production to use and discard: the continuous flow of the chaîne opératoire.</i>	98
4.3. FROM COLLECTION TO INTERPRETATION: BRIDGING METHODS AND DATA.....	99
4.3.1 <i>Sampling strategies and data analysis.....</i>	101
4.3.2 <i>Investigating continuity and discontinuity: the integration of analytical, macroscopic and contextual data.</i>	103
CHAPTER 5 PHAISTOS FROM FINAL NEOLITHIC TO EARLY BRONZE AGE: SITE AND MATERIALS	113
5.1. THE MILIEU OF PHAISTOS: ENVIRONMENTAL AND CULTURAL APPRAISAL OF THE FN-EBA PHASES.....	113
5.1.1 <i>The environment.</i>	113
5.1.2 <i>The human occupation of the site.</i>	118
5.2. THE FN-EM I POTTERY AT PHAISTOS.....	129
5.2.1 <i>Past and current issues.</i>	129
5.2.2 <i>Pottery and Context.</i>	132
CHAPTER 6 RECONSTRUCTING THE CHAÎNE OPÉRATOIRE: FROM ANALYSES TO TECHNOLOGICAL CHOICES.....	143
6.1. PASTE: RAW MATERIAL CHOICES AND MANIPULATION.....	143
6.1.1 <i>The BLUE fabric.</i>	148
6.1.2 <i>The PINK fabric.</i>	149
6.1.3 <i>The VIOLET fabric.</i>	149
6.1.4 <i>The PURPLE fabric.</i>	150
6.1.5 <i>The YELLOW fabric.</i>	151
6.1.6 <i>The ORANGE fabric.</i>	152
6.1.7 <i>The BROWN fabric.</i>	153
6.1.8 <i>The RED fabric.</i>	153
6.1.9 <i>The GREEN fabric.</i>	154
6.1.10 <i>Loners and Small groups.</i>	154
6.1.11 <i>Grog group.</i>	155
6.1.12 <i>Raw material choice and manipulation at Phaistos.</i>	158
6.2. FORMING TECHNIQUES OVER TIME: SUMMARY OF THE EVIDENCE.	163

6.3.	PRE-FIRING SURFACE TREATMENTS.....	165
6.3.1	<i>Techniques involving the use of tools only: scraping, scoring, wiping, smoothing, burnishing, incising, impressing.</i>	166
6.3.2	<i>Tools and raw materials: granulation, slipping, painting, washing.</i>	167
6.4.	FIRING PROCEDURES.....	169
6.4.1	<i>Firing temperatures and gradients.</i>	171
6.4.2	<i>Firing structure.</i>	173
6.5.	POST-FIRING SURFACE TREATMENTS.....	180
6.5.1	<i>Surface treatments of FN III-EM IB ceramics at Phaistos: concluding remarks.</i>	180
6.6.	FN-EM I POTTERY MANUFACTURE AT PHAISTOS: A TECHNOLOGICAL REVOLUTION?	184
CHAPTER 7 RECONSTRUCTING THE CHAÎNE OPÉRATOIRE: FROM TECHNOLOGICAL CHOICES TO OBJECTS, TO PEOPLE		187
7.1.	RECONSTRUCTING CHAÎNES OPÉRATOIRES OVER TIME.....	188
7.1.1	<i>PHASE I.</i>	189
7.1.2	<i>PHASE II.</i>	193
7.1.3	<i>PHASE III.</i>	201
7.1.4	<i>PHASE IV.</i>	209
7.2.	CERAMIC PRODUCTION IN THE CONTEXT OF PHAISTOS IN THE FN-EM I PHASES... ..	219
7.2.1	<i>PHASE I.</i>	221
7.2.2	<i>PHASE II.</i>	222
7.2.3	<i>PHASE III.</i>	223
7.2.4	<i>PHASE IV.</i>	225
7.3.	CERAMIC TECHNOLOGICAL CHANGE AND CONTINUITIES IN TIMES OF TRANSITION: THE FN-EM I FROM THE POINT OF VIEW OF PHAISTOS.....	231
CHAPTER 8 CONCLUSION		237
8.1.	TECHNOLOGICAL CHANGE IN CERAMIC MANUFACTURE IN THE FINAL NEOLITHIC-EARLY BRONZE AGE TRANSITION.....	237
8.2.	CERAMIC PRODUCTION IN CONTEXT: PHAISTOS AND CRETE IN THE FN-EM I TRANSITION.....	239
8.3.	RECONSTRUCTING TECHNOLOGY, RECONSTRUCTING SOCIETIES: RECONSIDERING THE METHODS OF ANALYSIS.	243
8.4.	ACHIEVEMENTS AND FUTURE RESEARCH PROSPECTS.....	245
BIBLIOGRAPHY		249

(In electronic format)

Appendix I Ware classification, list of samples and sample pictures	269
Appendix II Macroscopic Observations	389
a. Surface treatment	389
b. Colour change in section as an indicator of firing procedures	398
c. Fashioning technique	410
Appendix III Petrographic examination	415
Appendix IV SEM examination of the ceramics	465
a. Technical details	465
b. Firing strategies and body raw material choices	465
c. Surface treatment	486
Appendix V FTIR analysis of the ceramics	501
a. Technical details	501
b. Results	501
c. Firing procedure estimations.	507
Appendix VI XRD analysis of the ceramics	515
a. Technical details	515
b. Results	515
